iottag™

MK103

Versatile Integration
Supporting multi platform output including EMQTT, AWS, ALI, and custom configuration for third party platform.

Create Ultra-Large Zones
Scanning range for BLE can reach up to 200m, Wifi connectivity will be approximately 100m.

Plug & Track
A next-generation, affordable, plug-and-play BLE gateway that will help you accelerate the adoption of indoor IoT and location use-cases through infrastructure simplification.

Simplified Deployment
No extra installation equipment needed. Easily deploy your BP2 by plugging it into a power socket. Get it up and running in minutes.
